

MAKE NATURE YOUR CLASSROOM & ADVENTURE YOUR TOOL

One of our biggest challenges as adults is giving children the skills to cope with life itself.

Basecamp Wallaroo provides an opportunity for teachers and children to explore, learn, grow and develop strong team building skills in an idyllic, fun and safe environment.

Facilities include

Abseiling

Rock climbing

Push bikes

Low/High ropes course

Personal challenge course

Flying fox

Billabong

Canoeing

Fishing

Wildlife viewing

Natural timber seminar room

Swimming pool

BBQ

Campfire storytelling

Team building initiatives

Remote campsites

Showers/toilets

Basecamp Wallaroo has developed tailored programs to develop lifelong learning skills and capabilities in line with the Northern Territory Curriculum which recognises that these foundations are essential for preparing students for complex life roles.

Our programs can provide naturally occurring situations for teaching, learning and substantial evidence gathering, delivered in an integrated, challenging and fun context. **Students love learning through Basecamp Wallaroo!**

We design our programs to meet the specific needs of each different class or school. Programs combine camp and school based activities to achieve your specified outcomes, with exciting and challenging activities ranging from bushwalking and orienteering through to abseiling and rock climbing... to name a few!

Nestled in Australia's last frontier — the rugged Northern Territory landscape — with it's amazing flora and fauna, fresh air and tropical weather, Basecamp Wallaroo's programs combine physical and mental challenges balanced with team building fun to give you and your students a memorable and enlightening experience. Individuals benefit from expanded self belief and esteem.

"Everything was great, putting up our tents, sleeping in them and all the activities. They helped me get over my fear of heights. The best part of all time though was the flying fox and rock climbing. I really pushed myself to do that and I'm proud of it."

comment from a 2001 participant.
